

Subject Module  
 Department of Agrotechnology  
 Faculty of Agriculture  
 University of Islam Malang

## Module Handbook

<b>Module Title</b>	Biotechnology of Agriculture
<b>Module Level, if available</b>	Undergraduate, Study Program of Agrotechnology
<b>Subject Code</b>	MKW60628
<b>Headings, if available</b>	-
<b>Subject (MK)</b>	Biotechnology of Agriculture
<b>Semester</b>	5
<b>Course Coordinator</b>	Novi Arfarita, SP, MP, M.Sc, Ph.D
<b>Teaching Team</b>	Dr. Ir. Sunawan, MP
<b>Language of instruction</b>	Indonesian Language/English
<b>Linkages with the Curriculum</b>	Study Program : Agrotechnology Specialization: Agrotechnology  Type: Compulsory/ <del>elective</del>
<b>Learning Methods and Duration</b>	<ol style="list-style-type: none"> <li>1. Lecture: 100 minutes/meeting (14 meetings)</li> <li>2. Research Based Learning through Laboratory Work, experiment : 170 minutes/meeting (8 meetings)</li> <li>3. Assignments and Presentation (individual and group)</li> </ol>
<b>Student Study Load</b>	<ol style="list-style-type: none"> <li>1. Lecture: 100 minutes/meeting (14 meetings)</li> <li>2. Laboratory Work: 170 minutes/meeting (8 meetings)</li> <li>3. Assignments/quiz/presentation</li> <li>4. Attendance: 75% of total attendance</li> </ol>
<b>Credit Weight</b>	3 credits or 5.1 ECTS
<b>Requirements for Passing the Course</b>	<ul style="list-style-type: none"> <li>• Attendance &gt;75%</li> <li>• The final score of all the components of the learning evaluation &gt;44</li> </ul> The final score component: <ul style="list-style-type: none"> <li>• 25% Midterm Exam</li> <li>• 25% Final Exam</li> <li>• 20% Laboratory Work</li> <li>• 20% Assignments/Presentation (individual and group)</li> <li>• 10% Presence</li> </ul>
<b>Prerequisite Subjects</b>	Microbiology, Biochemistry, Physiology of Plant
<b>Learning Outcomes</b>	The expected learning outcomes are: <ol style="list-style-type: none"> <li>1. Have an attitude of creative and innovative thinking in their work in accordance with professional ethics in the field of agriculture (ILO 1).</li> </ol>

	<ol style="list-style-type: none"> <li>2. Behave according to the professional code of ethics in agriculture based on the preaching of the Islamic faith of Ahlusunnah wal Jama'ah (ILO 2).</li> <li>3. Have good and deep knowledge in the field of basic agricultural science that supports Agrotechnology (ILO 3).</li> <li>4. Able to solve problems that arise in the field of agrotechnology and related fields of science (ILO 5).</li> <li>5. Able to apply agricultural practices based on <i>Good Agricultural Practices</i> (ILO 8).</li> <li>6. Able to manage plant production system (ILO 9).</li> <li>7. Able to design enterprise opportunities in the field of plant production (ILO 10).</li> </ol>
<p><b>Learning Content</b></p>	<p>After completing this course students are able to:</p> <ol style="list-style-type: none"> <li>1. Acquire knowledge of various approaches to manipulating and increasing the yield of crops, livestock, and microorganisms in a variety of fields.</li> <li>2. Demonstrated the ability to develop, interpret and critically evaluate modern approaches to scientific study.</li> <li>3. Know a variety of techniques for manipulation of plants, animals, and microorganisms.</li> <li>4. Have the ability to communicate about science</li> </ol> <p><b>The topics include:</b></p> <ol style="list-style-type: none"> <li><b>1. Introductions</b> <ul style="list-style-type: none"> <li>• Definition</li> <li>• History</li> <li>• Concept</li> <li>• Benefits of Biotechnology</li> </ul> </li> <li><b>2. Techniques in Biotechnology</b> <ul style="list-style-type: none"> <li>• Fermentation</li> <li>• Genetic Analysis</li> <li>• Selection and Breeding</li> <li>• DNA analysis</li> <li>• Cell and Tissue Culture</li> <li>• Genetic Engineering</li> </ul> </li> <li><b>3. Cell Biology</b> <ul style="list-style-type: none"> <li>• Type of cell structure in prokaryotic and eukaryotic</li> <li>• Animal and plant cells.</li> <li>• Function of Cell Organelles.</li> </ul> </li> <li><b>4. Molecular Genetics</b> <ul style="list-style-type: none"> <li>• Location of genetic material</li> <li>• Building blocks of chromosomes.</li> <li>• Building blocks of DNA and RNA</li> </ul> </li> <li><b>5. Technology of Biofertilizer</b> <ul style="list-style-type: none"> <li>• Soil fertility concept</li> <li>• The difference between chemical fertilizers, organic fertilizers and biological fertilizers</li> <li>• Biofertilizer concept</li> <li>• The advantage of using biological fertilizers</li> </ul> </li> <li><b>6. Types of Biofertilizer</b> <ul style="list-style-type: none"> <li>• Group of Biofertilizers based on their nature</li> <li>• Group of Biofertilizers based on function</li> </ul> </li> <li><b>7. Biofertilizer for Consolidating Soil Aggregates (Producing Exopolysaccharides)</b> <ul style="list-style-type: none"> <li>• Soil Aggregation</li> <li>• Factors that influence aggregate stability.</li> </ul> </li> </ol>

	<ul style="list-style-type: none"> <li>• Organic agents that can increase the stability of soil aggregates.</li> <li>• Method to observe oil aggregation</li> </ul> <p><b>8. Environmental Biotechnology</b></p> <ul style="list-style-type: none"> <li>• Biodegradation</li> <li>• Bioremediation</li> <li>• Biotechnology of Environment</li> </ul> <p><b>9. Genetic Replication</b></p> <ul style="list-style-type: none"> <li>• Replication</li> <li>• Transcription</li> <li>• Translation</li> </ul> <p><b>10. Protein synthesis</b></p> <ul style="list-style-type: none"> <li>• Definition</li> <li>• Process</li> <li>• The linkage of protein synthesis with genetic material</li> </ul> <p><b>11. Genetic Engineering Techniques in Plants.</b></p> <ul style="list-style-type: none"> <li>• DNA Extraction</li> <li>• Gene Cloning</li> <li>• Gene Design</li> <li>• Transformation</li> <li>• Backcross Breeding</li> </ul> <p><b>12. Plant Protection Biotechnology against</b></p> <ul style="list-style-type: none"> <li>• Pest</li> <li>• Plant Diseases</li> </ul> <p><b>13. Agricultural Waste Biotechnology.</b></p> <ul style="list-style-type: none"> <li>• Compost</li> <li>• Biogas</li> </ul> <p><b>14. GMO Product Regulations</b></p> <ul style="list-style-type: none"> <li>• Biosafety in food and environment</li> <li>• Ethics</li> </ul>
<b>Test Terms and Forms</b>	<p>Examination requirements: A minimum of 75 % attendance to attend the final exam</p> <p>Forms of examination: Essay</p>
<b>Learning Media</b>	<p>Projector and screen, Zoom application, Skype, e-book, WA Group, Practicum Manual, samples from the field and consumer goods for research-based learning.</p>
